MOOC: Conservation and Environmental Sustainability of Vernacular Architecture

Dear prospective student:

Within the framework of the Smart Rehabilitation 3.0 Project, financed by the European Union, we have developed open online training courses (MOOCs), with the participation of different universities, which you can consult on the project's website.

Currently and throughout the testing period, we have the first edition of the course CONSERVATION AND ENVIRONMENTAL SUSTAINABILITY OF VERNACULAR ARCHITECTURE developed by members of the teaching staff of the Department of Architecture of the University of Cyprus.

In addition, the following courses are also developed within the project and are now available:

- ACCOMPANIED SELF-RENOVATION HABITABILITY AND SAFETY CONDITIONS IMPROVEMENT, from the Polytechnic University of Catalonia (Spain);
- APPROACHES, TECHNIQUES AND INTERVENTIONS FOR THE REHABILITATION OR RESTORATION OF ARCHITECTURAL HERITAGE from the University of Palermo (Italy);
- WOODEN BUILT HERITAGE AS A RENEWABLE RESOURCE FOR LOCAL DEVELOPMENT from the Technological University of Kaunas (Lithuania).

MOOC: Conservation and Environmental Sustainability of Vernacular Architecture

We encourage you to register for this free open line course (MOOC), to test the platform's operation and to suggest possible alterations / improvements that you would like to see implemented. To do so, please apply through the [project's page](#) in the "CONTACTS" section, leaving us your name, email address and indicating in the "Message" space your interest in enrolling in the **MOOC “CONSERVATION AND ENVIRONMENTAL SUSTAINABILITY OF VERNACULAR ARCHITECTURE”** and, if possible, provide the name of the entity where you work or the university where you study. Remember that you can also register for the other 3 MOOCs available.
